

## **MAKING SENSE OF VULVAL DISORDERS**

**Katrien Dehaeck**

*Gynaecological Oncologist, Private and GSH, South Africa*

In this session I will be discussing and showing pictures of a variety of vulval disorders, from atrophy, to inflammatory and dermatological lesions. Special attention will be given to the following:

- Lichen sclerosis et atrophicus
- Candida
- Lichen simplex chronicus, Lichen planus
- Pagets disease
- Vulvodynia

The talk will also give a systematic approach to the symptoms of itch and burn, bleeding or a lump.

Differentiated and undifferentiated VIN will be explained according to the different etiology of either HPV, or Lichen Sclerosis.

The talk will also cover Invasive cancer and how to make the diagnosis, when, when not and how to take biopsies.

Management of all the various conditions will be discussed.
